

Fubuki 1

Place the numbers 1 to 9 in the grid so that each number appears only once. To work out where each number goes, note the values at the end of each row and column. These numbers indicate the sum of the numbers in that row or column.

Using that information, you can solve the fubuki puzzle by logically working out what must go where. There is only one valid solution for each puzzle.

			17
4			17
2	6	3	11
15	21	9
